Bamboo

Godfrey Hirst Bamboo is a key selection of visually engaging and durable floors for your home.

Only the finest, strand woven bamboo is cold pressed to the highest standard to create your Godfrey Hirst Bamboo floor.

Select from solid or wider engineered boards that each feature an 11 coat wear resistant finish in matte or gloss.

Godfrey Hirst Bamboo flooring is easy to clean and maintain, to give you more time to relax and enjoy your home.

Bamboo plantations are fast growing, thus providing a renewable source of flooring for your interior space.

Both solid and engineered Godfrey Hirst Bamboo floors feature 'glueless' installation that can be walked on the same day.

Zen Bamboo brings style and durability together

The Zen range creates inspiring spaces that leave a lasting impression in both modern and traditional homes.

Select from warm, natural bamboo hues or rich carbonised tones in brushed and matte finishes. Matching stair nosings are also available in all colours.

Enjoy the beauty of your Godfrey Hirst Bamboo floor thanks to WearGuard™, a hard-wearing surface of 11 coats that protects against dirt, wear and spills for easy care and maintenance.

WEARGUARD™

Godfrey Hirst Bamboo is certified to the standards of the Forest Stewardship Council (FSC), meeting the strict criteria for environmental sustainability and social responsibility.

Supplied from its own managed and native forest of Mosu Bamboo species, Godfrey Hirst Bamboo is one of the fastest growing hard flooring options, regenerating every 6 years for harvest.

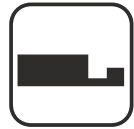

Environment

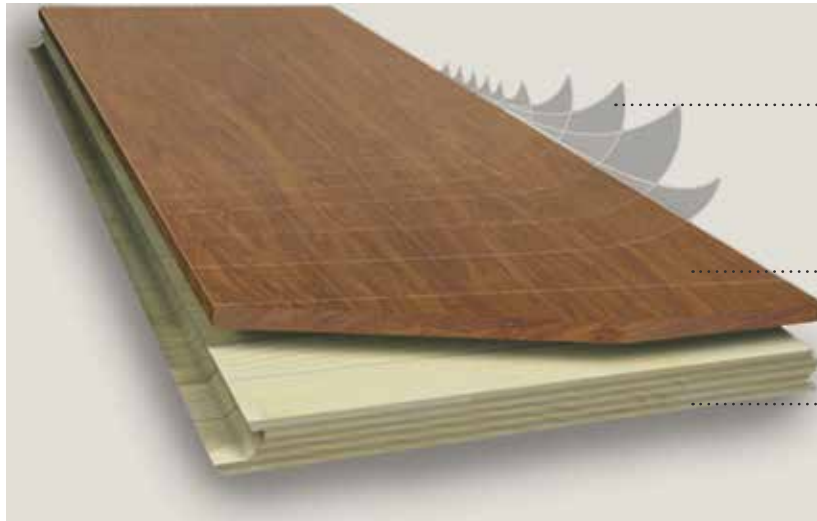

Solid

1. Wearguard™ is a hard-wearing surface of 11 coats that protects your Godfrey Hirst Bamboo floor from everyday wear and tear.
2. Godfrey Hirst Bamboo is strand woven, made of shredded bamboo that is cold pressed into shape.

Top Lock™ system on all solid boards locks the floor together for easy installation.

Engineered

1. Wearguard™ is a hard-wearing surface of 11 coats that protects your Godfrey Hirst Bamboo floor from everyday wear and tear.
2. A strand woven, cold pressed Bamboo top layer.
3. A multi layer plywood core provides added stability to allow for a wider finished board.

True Clic™ locking system on all engineered boards locks the floor together easily and securely.

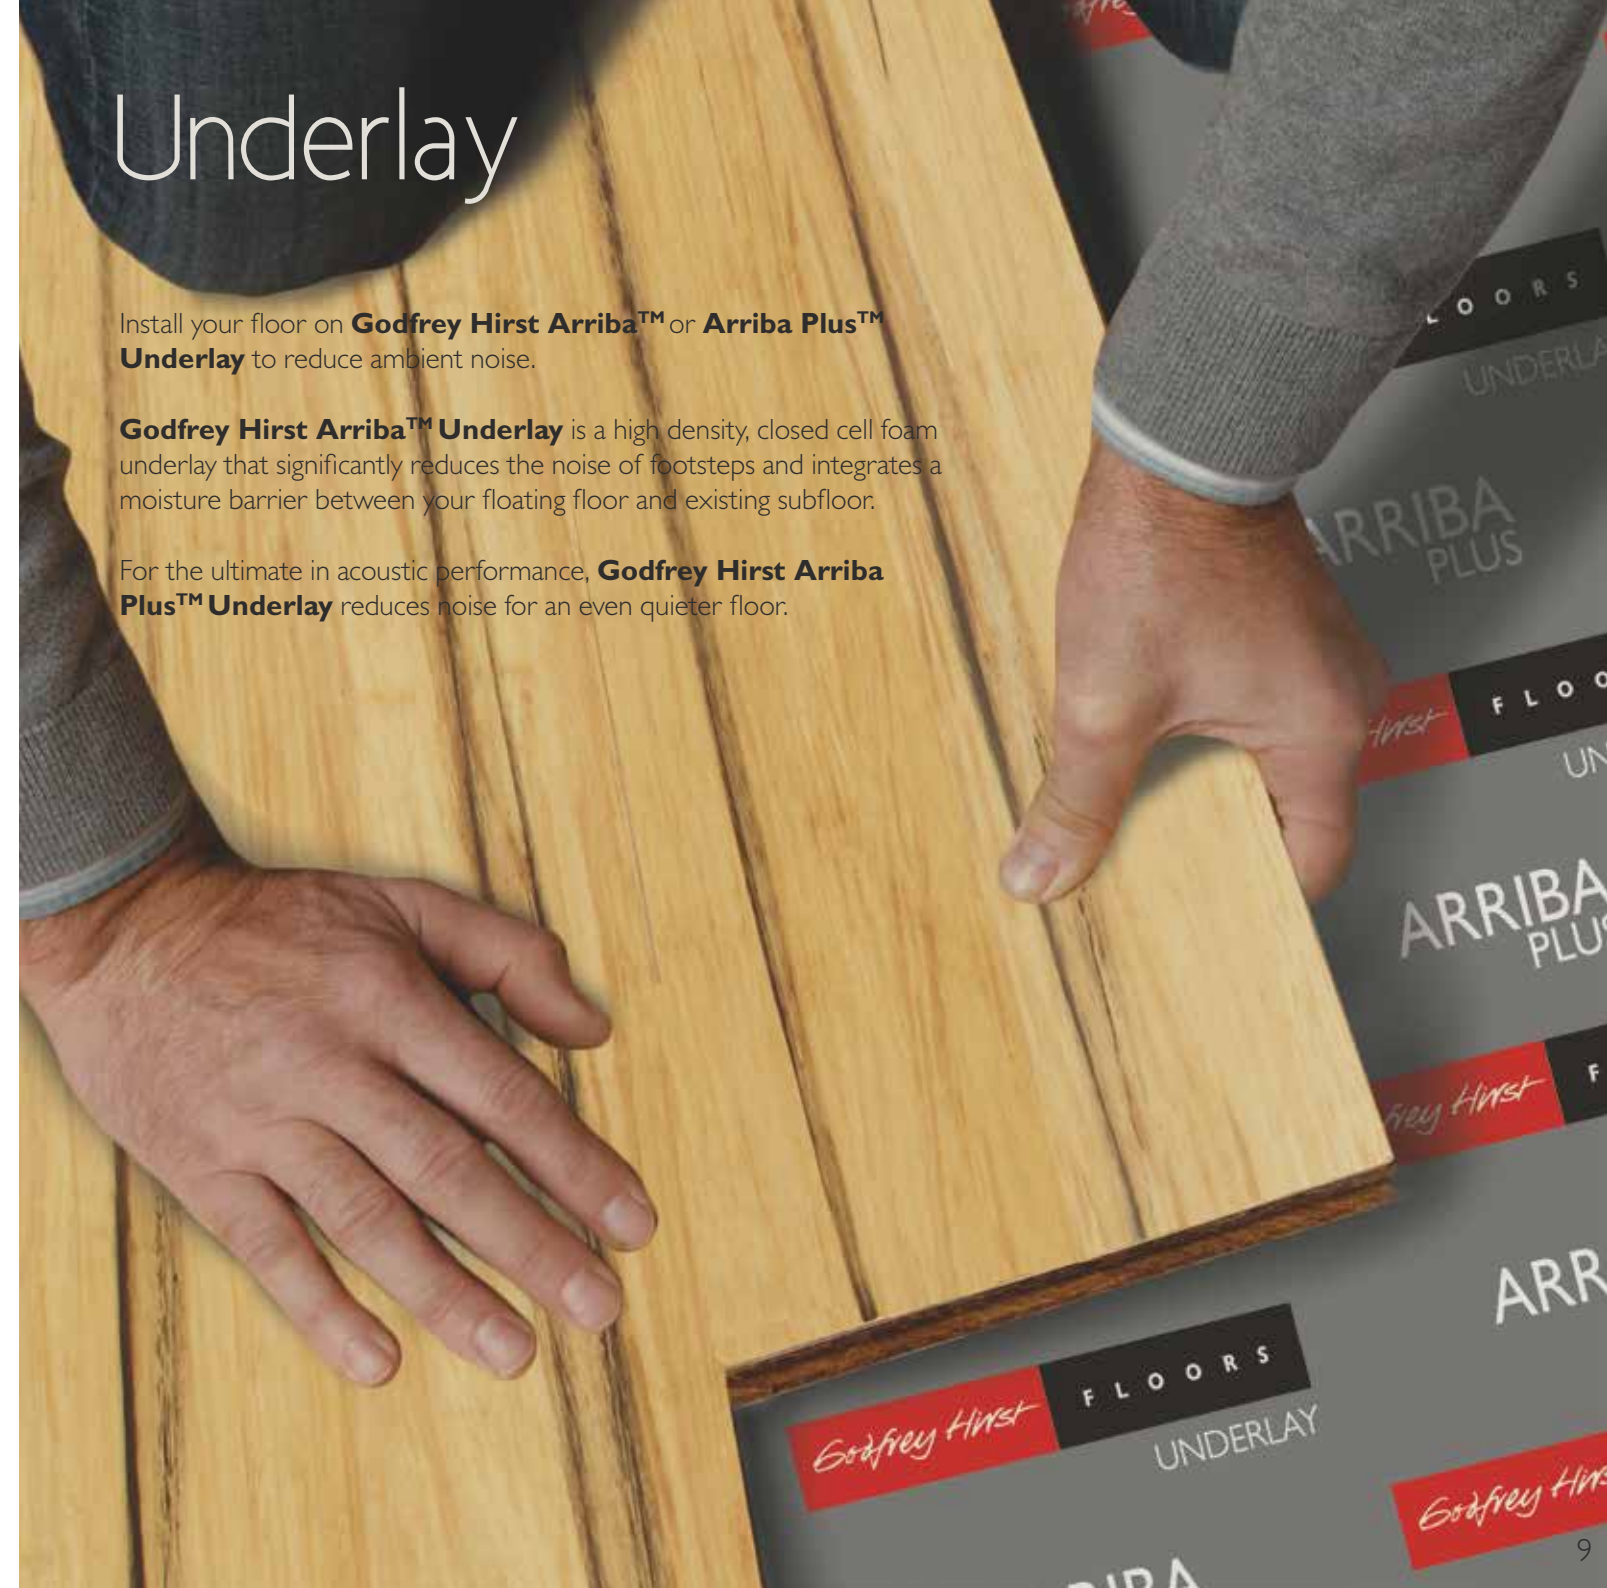

Both Top Lock™ and True Clic™ locking systems allow for fast, simple DIY installation. No glue or nails are required and you can install and walk on your new Godfrey Hirst Bamboo floor the same day.

Underlay

Install your floor on **Godfrey Hirst Arriba™** or **Arriba Plus™ Underlay** to reduce ambient noise.

Godfrey Hirst Arriba™ Underlay is a high density, closed cell foam underlay that significantly reduces the noise of footsteps and integrates a moisture barrier between your floating floor and existing subfloor.

For the ultimate in acoustic performance, **Godfrey Hirst Arriba Plus™ Underlay** reduces noise for an even quieter floor.

Product Features

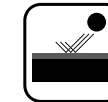

The select features of Godfrey Hirst Bamboo Floors are explained below. Look for these various feature icons on product samples in store and online:

PROFILE

Micro-bevel edges create a small V-shaped edge between boards. This outlines each board for an authentic floorboard finish.

HARDNESS RATING

The hardness of bamboo is measured by the **Janka Rating**. This is the industry standard for determining the ability of the bamboo to withstand denting and wear. A high 16kN rating indicates a very hard floor.

FINISH

Boards with a brushed **matte finish** feature a natural look and feel while **gloss** boards have a striking, polished finish.

COLD PRESSED

Godfrey Hirst Bamboo is **cold pressed**, for greater uniformity in density, colour and moisture content, as well as visual appeal.

FINISH

Boards with a brushed **matte finish** feature a natural look and feel while **gloss** boards have a striking, polished finish.

WEARGUARD™

Wearguard™ is a hard wearing surface of 11 coats that protects against dirt, wear and spills and makes for easy care and maintenance.
